DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 6/29/04 have been fully considered but they are not persuasive.

With respect to the applicant argument regarding the Shiobara reference in the fourth paragraph of the remarks section at page 2 that "Shiobara does not show or suggest forming any portion of element 8 with a shape that conforms to the shape of the tip ball," the examiner would like to point out that there isn't any limitation in claims 1 and 13, which is claiming the argued step of "forming." The claims merely claiming the contact element (member 14 of the instant application) being configured for contacting the tip ball (in line 9 of claim 13) and having a shape adapted to conform (functional language) to the shape of the tip ball (member 36 of the instant application). However, the Shiobara reference contact element (8c) of the ball pusher (8) does have a shape adapted to conform to the shape of the tip ball (6), which is clearly shown in Shiobara Fig. 4. Like Shiobara, Okamoto contact element (5a) of the ball pusher (5) does have a shape adapted to conform to the shape of the tip ball (1), which is clearly shown in Shiobara Fig. 4.

With respect to the applicant argument regarding the support element "does not contact said biasing element in a lateral direction," the examiner would like to point out that both Shiobara and Okamoto references clearly shown, in Fig. 4 of both references, that the biasing elements (7) and (6), respectively, contact a rear surface of the support element in a similar fashion as that shown in Fig. 2 of the instant application. The

Art Unit: 3751

biasing element does not contact the support element in the lateral direction, which is about the side, which is where lead line of reference numeral (8b) of Shiobara is pointing and where lead line of reference numeral (5) of Okamoto is pointing.

Accordingly, the rejections set forth in the previous office action are maintained as indicated below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 1. Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Shiobara et al.

Shiobara et al., as seen in Fig. 4, includes a housing (4) as claimed, a tip ball (6) as claimed, a biasing element (7) as claimed, and a ball pusher (8) as claimed.

2. Claims 1-9, 11-13 and 15-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Okamoto et al.

Okamoto et al., as seen in Fig. 4, includes a housing (2) as claimed, a tip ball (1) as claimed, a biasing element (6) as claimed, and a ball pusher (5, 5a) as claimed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3751

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 10 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Okamoto et al. in view of Shiobara et al.

Although the support element (5) of the Okamoto et al. reference does not include at least one cut out portion from a front face to a rear face thereof, attention is directed to the Shiobara et al., which discloses an analogous point assembly having a ball pusher with a support element portion and a contact element as claimed; wherein the support element have cut out portions from a front face to a rear face thereof to provide ink passages thereat. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to employ, on the Okamoto et al. support element device, cut out portions as, for example, taught by Shiobara et al. in order to provide a better ink flow.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Application/Control Number: 10/698,973 Page 5

Art Unit: 3751

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan N. Nguyen whose telephone number is 703-306-9046. The examiner can normally be reached on Monday-Friday (10:00-6:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory L. Huson can be reached on 703-308-2580. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
